Long ago in Ethiopia's mountains, a shepherd noticed his goats dancing after eating bright red berries. Curious, he tried them and felt sudden energy. These berries became the world's first coffee beans.

From those mountains, coffee traveled across continents — roasted in Arabia, traded through Persia, brewed in Turkish markets, and later shipped to Europe, Asia, and the Americas. Today, coffee is one of the world's most loved drinks, all beginning with a tiny bean and its remarkable journey.
